

## Course Feedback Report - Fall 2015 - CRN: 62576

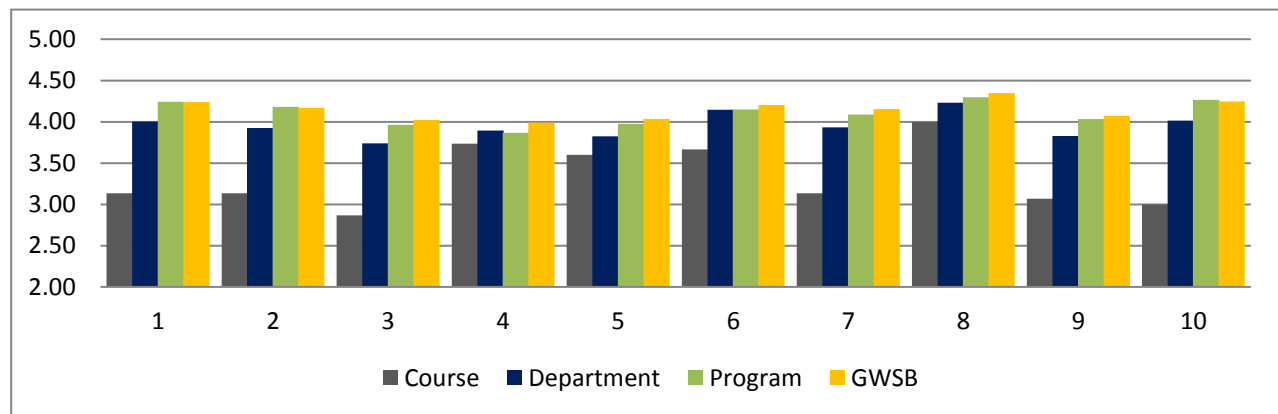

<b>Semester</b>	Fall 2015	<b>Module</b>	Module 2		
<b>CRN</b>	62576	<b>Course Code</b>	ISTM 4121	<b>Section</b>	10
<b>Course Name</b>	Expert Database Systems: Database Design & Application				
<b>Faculty Name</b>	Rossetti, Michael				
<b>Department</b>	ISTM	<b>Program</b>	BADM	<b>Level*</b>	UG
<b>Responses</b>	15	<b>Enrollment</b>	36	<b>Response Rate</b>	42%

\* UG: Undergraduate G: Graduate D: Doctoral

COURSE FEEDBACK FORM LEGEND	
<b>Question 1</b>	The course is well organized (1: Not at all, 5: Well organized)
<b>Question 2</b>	Instructor effectively communicates subject matter (1: Not at all, 5: Very effective)
<b>Question 3</b>	Instructor stimulates student interest (1: Not at all, 5: A great deal)
<b>Question 4</b>	The course is challenging (1: Not at all, 5: Very challenging)
<b>Question 5</b>	I learned a lot from this course (1: Not at all, 5: A great deal)
<b>Question 6</b>	Instructor's grading standards are fair (1: Not at all, 5: Very fair)
<b>Question 7</b>	Instructor provides timely feedback (1: Not at all, 5: Very timely)
<b>Question 8</b>	Instructor is accessible (1: Not at all, 5: Very accessible)
<b>Question 9</b>	Overall quality of the course (1: Poor, 5: Excellent)
<b>Question 10</b>	Overall quality of the instructor (1: Poor, 5: Excellent)
<b>Question 11</b>	What did you like most about this course?
<b>Question 12</b>	What did you like least about this course?
<b>Question 13</b>	Any suggestions to improve this course?

## Course Feedback Report - Fall 2015 - CRN: 62576

### Question 11

- \* SQL
- \* I learned about databases
- \* Learning about MySQL database
- \* The way the professor taught.
- \* I could learn SQL to use Microsoft Access. Can draw ERD and define entity relations.
- \* I liked the concept
- \* the subject matter was definitely directly related to A career in ISTM
- \* I liked that this course dealt with idea of data science and how contemporary data is used in real world.
- \* I did not like the course, it is a prerequisite for another course.
- \* I learned new skills such as SQL and other technical skills.
- \* The midterm grade terms.
- \* The ability to leverage new database tools from data visualization to completing more efficient data processing.
- \* I learned basics about MS access, SQL and ERD.

### Question 12

- \* Disorganized and unclear coarctation a throughout
- \* My project group
- \* Schedule is never followed by the professor.
- \* The professor usually take too long to make the agreement of a proposal between each student.
- \* Some of the contents were not understandable at all.
- \* The execution was vague
- \* the professor did not organize the course effectively, using external sites like Github that the students were not familiar with.
- \* the professor
- \* Although the course was held once a week, the length of each session was a little too long. I rather attend two 75 minute session a week than one 150 minute session.
- \* Changes to the flow of the class as it went on. Time spent on certain factors went long and assignments were not clear of when due.
- \* The lectures were not engaging and I felt like I could've understood more if they were.
- \* The materials is kind of difficult.
- \* Toughest part was learning coding.
- \* material is not fit for the level of the class
- \* Lectures very poorly constructed. Instructor unable to communicate clearly and efficiently. He put in his efforts in lectures, but they were neither clearly nor informative. Instructions for assignments were very vague, which made it harder to finish them. Grades were not given back in time. The assignments worth 50% of the total grade, but up until now not even half of the grades were given back, which made it very hard for me to assess my performance.

### Question 13

- \* Follow the schedule / Limit how time is spent / Don't get sidetracked
- \* I think he could be a good teacher after a few more semesters.
- \* Professor should follow the schedule he makes to the class rigorously instead of doing everything last minute.
- \* What the professor good at is Mysql in Mac system, the TA is good at Access in Windows, so when ask a quetion concerning Access, the TA may not know how to answer and the professor may not sure whether his answer is applied to the Access.
- \* I think the course should be organized in a different way. Start with ERD, learn about database in depth, and then learn about how to extract information from it. Learning web application using Python was very, very hard.
- \* More in class examples and faster pace
- \* Knowing what was due, and the descriptions of assignments much more in advance.
- \* To the professor / Need to work on presentation skills and using the class time efficiently. Also need to work on grading scales. They are extremely subjective. You cannot deduct 13 points from an assignment and have the only comment be 'good'. If you are going to deduct any points, even one, you should be able to provide specific feedback as to why. This happened to more than one of my assignments....
- \* The instructor is doing a great job. I can't think of any.
- \* I think that more should be front loaded and all information should be available in the beginning. Even without understanding, It would still help to be able to pick up the information as the class continues
- \* N/A
- \* Need a lot of overall improvement.
